

Press Release

Innomotics Unify: Roll-Out of new control platform for medium voltage drives announced

- Unified control platform reduces complexity and enables faster development across Innomotics' drive products
- Designed to meet current and future cybersecurity requirements
- Based on the CU320-3 control platform of the new Siemens Sinamics series

Nuremberg, November 27, 2025 – Innomotics introduces a new control platform for its medium voltage drives. "Innomotics Unify" combines the strengths of existing systems while reducing technical and organizational complexity. As part of a phased rollout, the entire Innomotics drives portfolio will be based on Innomotics Unify. The GM150 series will be the first starting in December 2025.

Innomotics Unify offers numerous benefits, including standardization across the entire Innomotics drive line-up, seamless customer experience and faster innovation cycles. Based on the CU320-3 control platform of the new Siemens Sinamics series, Innomotics Unify is the result of a close collaboration between Innomotics and Siemens.

Achim Peltz, CEO Siemens Motion Control: "With the new Innomotics Unify platform we are taking an important step forward in the technological cooperation between Siemens and Innomotics in the drive sector. I wish Innomotics a successful market launch of the new system."

Michael Reichle, CEO Innomotics: "With Innomotics Unify we are setting an industry benchmark for the next decades. We design Unify with a clear vision: A secure, fully digitalized and harmonized platform that emphasizes what our customers need. Innomotics Unify significantly simplifies and optimizes processes for everybody working with our drives, thus increasing system efficiency."
