

## Active Environmental Protection: We walk the talk on sustainability!

**Managing resources efficiency, safeguarding the environment, and addressing decarbonization efforts.**

UNGC Principle 7 - Businesses should support a precautionary approach to environmental challenges.

UNGC Principle 8 - undertake initiatives to promote greater environmental responsibility.

Material Topic	UN SDGs	Commitment and Initiatives
Resource efficiency and environmental protection	<p><b>UN SDG 6</b> CLEAN WATER AND SANITATION</p> <p><b>UN SDG 12</b> RESPONSIBLE CONSUMPTION AND PRODUCTION</p> <p><b>UN SDG 14</b> LIFE BELOW WATER</p> <p><b>UN SDG 15</b> LIFE ON LAND</p>	<p>Our commitment to environmental protection is embedded in our <a href="#">Quality &amp; EHS Policy</a>. We drive resource efficiency and environmental protection through targeted initiatives. Our efforts include promoting biodiversity through dedicated programs, minimizing waste via recycling and reduction strategies, preventing and controlling pollution, expanding the use of renewable energy, and optimizing water use and wastewater management. With <a href="#">ISO 14001</a>-certified facilities, we ensure compliance with rigorous environmental standards and continuously work on reducing our environmental impact.</p>
Decarbonization	<p><b>UN SDG 7</b> AFFORDABLE AND CLEAN ENERGY</p> <p><b>UN SDG 13</b> CLIMATE ACTION</p>	<p>We are committed to driving decarbonization through comprehensive sustainable practices across both our operations and our entire value chain.</p> <p>Our decarbonization strategy focuses on reducing Scope 1 and Scope 2 emissions while enhancing energy efficiency through various measures, including our <a href="#">ISO 50001</a>-certified facilities that ensure energy-efficient operations.</p> <p>Across our value chain, we focus on enhancing transparency on emissions from materials, production, and transportation, while actively working to reduce product and service emissions through sustainable practices, including eco-friendly transportation solutions. Moreover, by utilizing tools such as <b>Carbon Web Assessments (CWA)</b>, we evaluate our suppliers' decarbonization strategies and support them on their decarbonization journey.</p>
