

The background of the slide is a photograph of an industrial facility, likely a factory or warehouse. In the foreground, several large, cylindrical electrical components, possibly transformers or inductors, are visible. They have dark, metallic-looking cores with copper wire wound around them. Some of the wire is bundled with white tape. In the background, there are industrial structures, including metal frames and overhead lighting fixtures, creating a dimly lit, industrial atmosphere.

Transport Guidelines

Routing Order – Imports from the other EU countries to DE

The following conditions apply for goods specified in supplier conditions as “EXW / FCA / FOB”.

In General:

Please note that:

- the Innomotics order or purchase order number must be indicated in the freight documents without fail.
- Freight charges from the supplier will not be accepted.
- For EXW / FCA / FOB shipments, it is mandatory to provide the freight forwarder with the ORGID (= address identifier) of the ordering Innomotics unit.

For shipments containing dangerous goods you are responsible to transfer the necessary legally required dangerous goods data to the freight forwarder when placing the order. You are also responsible for packing, marking, labelling etc. in compliance with the regulation relevant to the used transport mode(s).

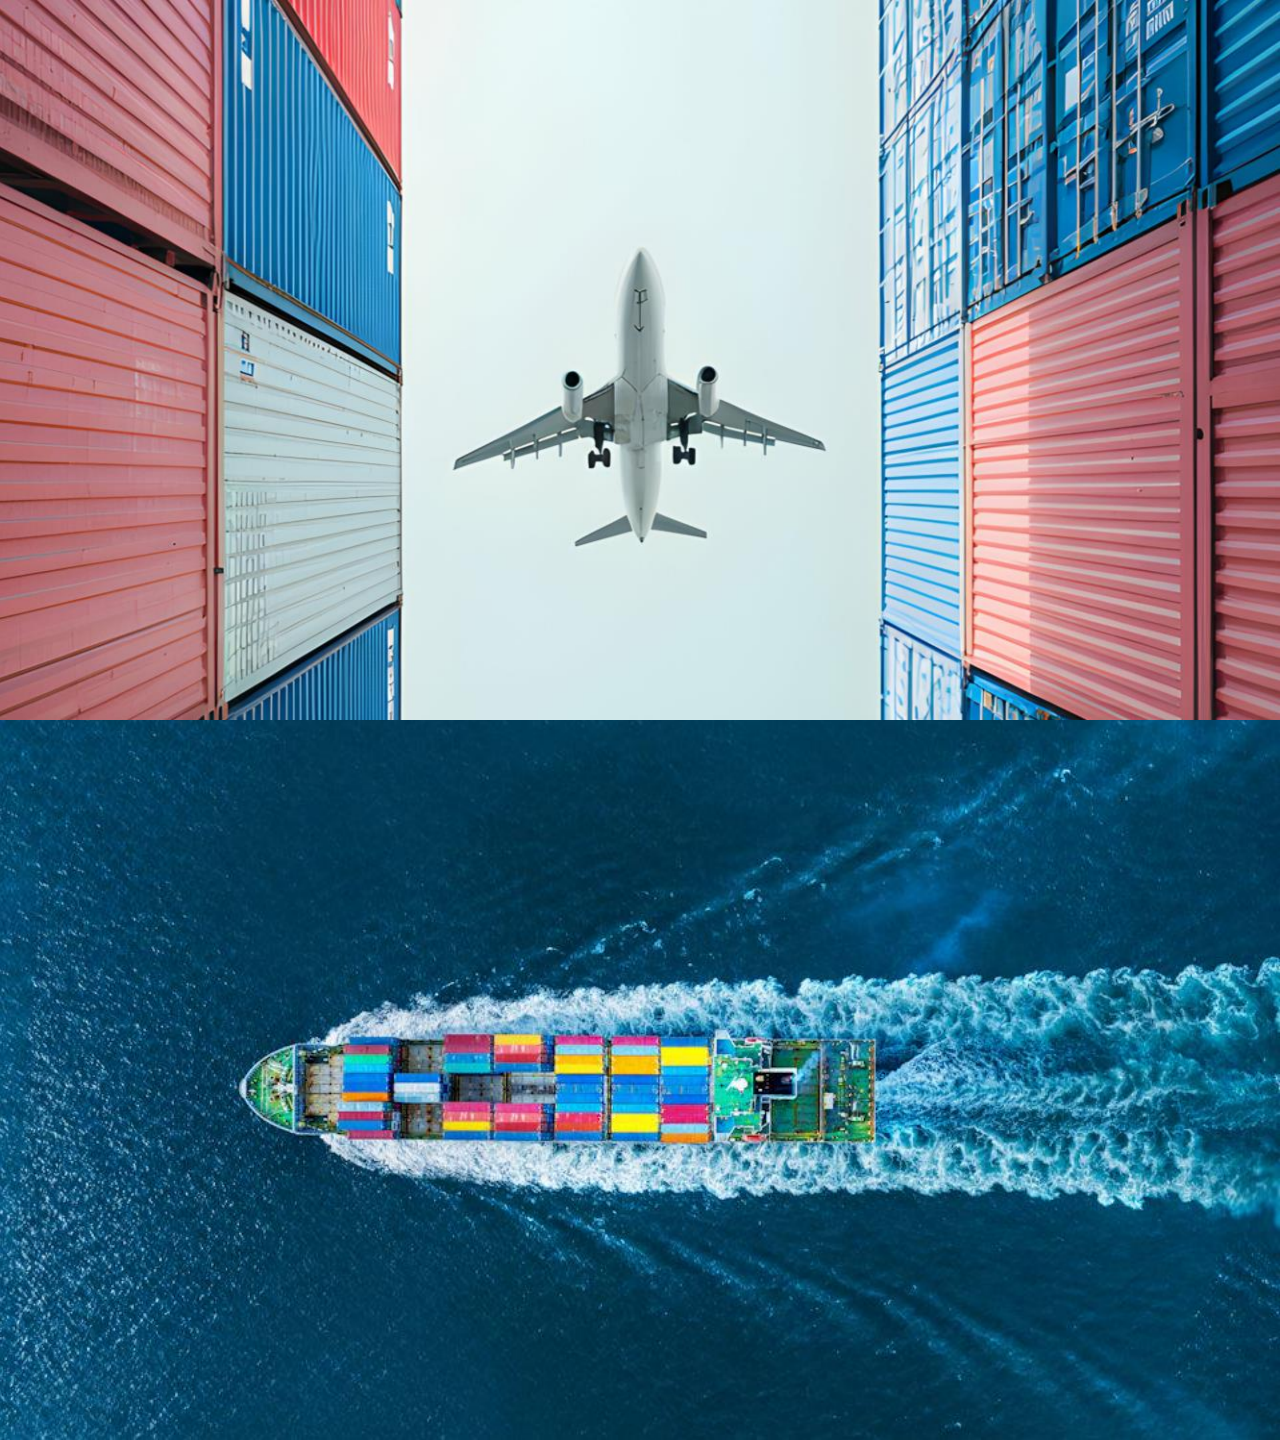

If this rule is not observed, the additional freight and administrative costs will be billed.

Attention:

If the delivery of the goods does not take place from the supplier's originally ordered country, it is mandatory for the supplier to contact the ordering Innomotics unit, so that the nominated transport service provider for this country can be used.

In case of non-compliance, Innomotics will charge the additional costs incurred for freight and administrative expenses.
