

Innomotics GM150

Build to adapt. Made to last.

Technical overview

Output voltage range	2.3 – 6.6 kV
Power range	1 – 21 MVA
Cooling	Air, water
Max. output frequency	250 Hz (induction motors) 90 Hz (separately excited synchronous motors, with encoder)
Open/Closed loop control	Fiber optic cable, isolating transformer (open and closed-loop control) Vector control (closed-loop control)
Degree of protection	According to IEC 60529: Standard: IP22 (air cooling), IP43 (water cooling) Optional: IP42 (air cooling), IP54 (water cooling)
