Press Release

Innomotics Relocates Brazilian Operations to New Modern Facility in Jundiaí

- Innomotics relocated its Brazilian factory to a brand new, modern facility in Jundiaí, consolidating manufacturing, offices, repair, and training capabilities to improve operational efficiency.
- The site is dedicated to producing the Innomotics Perfect Harmony GH180 medium-voltage drive, enhancing customer support and lifecycle services across Brazil and South America.
- The upgraded facility strengthens sustainability, achieving CO₂ neutral operations and reinforcing Innomotics' commitment to environmentally responsible industrial solutions.

Jundiaí, Brazil, March 30, 2026 – Innomotics has begun operations at its newly built manufacturing and office facility located at **Rua Fortunato Garcia Braga, 530, Jundiaí, São Paulo**, following the relocation of its existing Brazilian factory to a modern site designed to support future growth, efficiency, and sustainability. The new location strengthens the company's ability to serve customers in Brazil and across global markets while providing an enhanced environment for employees, customers, and partners. The site is dedicated to manufacturing the Innomotics Perfect Harmony GH180, a leading medium-voltage drive platform used in demanding industrial applications around the world.

INNOMOTICS

A modern facility supporting future growth

The relocation to the new site marks an important milestone in the continued development of Innomotics' operations in Brazil. Designed to combine modern infrastructure with operational efficiency, the facility creates a functional environment that supports employee well-being while enhancing the experience for customers and partners.

The Jundiaí site brings together manufacturing, corporate offices, and customer services under one roof. It also includes a repair center designed to provide fast and reliable service, as well as a dedicated training center to support the technical development of employees, customers, and partners.

"This new facility represents an important step in the continued development of our operations in Brazil," said Marcos Betioli, Head of the Jundiaí Factory. "By relocating to a modern infrastructure designed for efficiency and collaboration, we are strengthening our operational capabilities while creating a workplace that supports our people and long-term growth."

A strategic hub serving Brazil and the world

The new plant covers more than 8,000 square meters and benefits from Jundiaí's strategic location within one of Brazil's most important industrial regions. Its proximity to major highways enables efficient logistics connections across the state of São Paulo and beyond, improving service speed and strengthening collaboration with suppliers and partners.

The Jundiaí facility continues to play a key role in Innomotics' global production network. As the company's only factory in the Southern Hemisphere, it brings Innomotics closer to customers across South America while supporting global demand.

"In addition to operating our only factory in the Southern Hemisphere, the Jundiaí site exports part of our medium voltage drive production worldwide," said José Moreira, Executive Director for South America. "Products manufactured here are installed on virtually every continent."

INNOMOTICS

Commitment to sustainable operations

Innomotics Brazil recently achieved certification for the full neutralization of its CO₂ emissions, reinforcing the company's commitment to environmentally responsible operations. This milestone reflects Innomotics' broader sustainability strategy and strengthens its ability to support customers worldwide with efficient and responsible industrial solutions.
